

SITE ALTERATION REVIEW FORM

The Village of Lytton is committed to ensuring that property owners rebuilding or renovating their property, are aware of the provincial and municipal review requirements. In response, the Village has introduced an initial Site Alteration Review process to assist property owners in identifying and resolving possible site constraints.

Prior to any disruption of the property (which includes both excavation and filling), the Village encourages property owners to **provide the information outlined below and email to planning@lytton.ca**.

Information Needed from Property Owner or Applicant

Property Address: _____

Legal Description: _____

Description of Site Development Proposal: _____

Sketch of the Proposed Site Alteration (please attach)

Upon receiving this information, the Village will then circulate the information provided about the proposed development to the affected municipal departments and utilities considering items such as zoning, service connections, archaeology, utilities, property taxes and legal title and encumbrances. There is not cost for this review and will typically take approximately 7 to 10 days to respond to the property owner and/or applicant.
